

How to Apply

- Go to Grinnell Share and submit the Summer Research Application Form.
- Answer and email the questions below to Dr. Elliott (***Emails must be sent by February 17th, end of the day***):
 1. Academic honesty: you must write the answers yourself – help from AI systems is **not allowed**. Now, answer: did you get assistance from any AI system to answer the questions from this document?
 2. Why are you applying for this MAP and what are your research expectations?
 3. Visit the lab page (<https://elbica.cs.grinnell.edu/start-here/>) and answer: Why do you consider yourself a good fit for the ELBICA lab?
 4. Many positions are advertised in the ELBICA lab. Starting from your top choice, order each position according to your preferences. E.g.: Student 2, Student 7...
 5. Talk a bit about your top choice. What makes it interesting to you?
 6. What is the connection between your major/minor/concentrations and previous education with your top choice?
 7. Passion for doing research is a vital element in the ELBICA lab. What are your thoughts on that?
 8. The ELBICA lab emphasizes team collaboration. For you, what is the importance of team spirit?
 9. What does “being coachable” mean to you, and why is it important?
 10. If extended an offer, you **MUST** reply as soon as possible to help me plan for the summer and to extend the opportunity to another student (if you do not accept the offer). It is totally fine if you are unsure - just email me to acknowledge that you received the offer but need some time to figure things out. Here is the question: Do you understand that:
 - a) You **MUST** acknowledge that you received the offer as soon as possible?
 - b) If you do not accept the offer and do not keep me in the loop about your brainstorming, you may be taking away the opportunity from another student?
 - c) In the ELBICA lab, you are not allowed to get assistance from AI systems (unless clearly stated). Do you understand and agree to follow the non-AI-help policy?
